

Lev Ki

Software Engineer, Game Developer

Warsaw, Poland. Open to relocation

lev.ki.contact@gmail.com

linkedin.com/in/lev-ki/

Experienced Software Engineer with a strong background in both AAA and Indie game development. I specialize in gameplay systems programming, with experience in many other areas of game development, making me a strong generalist.

In my free time, I mentor aspiring game developers and engineers, helping them navigate their gamedev path, and sharing my knowledge.

Experience

CD Projekt Red, Poland (2021 - Present)

The Witcher 4 - Gameplay Programmer (2024 - Present) [Unreal Engine 5, C++]

- Owning, designing, and developing multiple game-defining, large-scale gameplay systems
- Coordinating work between multiple departments to ensure feature delivery in alignment with the project vision
- Creating designer-facing tools to allow for smooth content and narrative creation
- Owning and maintaining internal content validation tools

Cyberpunk 2077: Phantom Liberty - Generalist Programmer (2022 - 2024) [REDengine 4, C++]

- As a part of the RPG team, helped deliver the 2.0 update, completely revamping multiple large gameplay systems
- Owned and delivered universally loved gameplay features such as Perk Trees and Cyberware, contributed to the game design of said features
- Started and ran multiple knowledge sharing initiatives
- Supported my team as a Scrum Master

GWENT: The Witcher Card Game - UI Programmer (2021 - 2022) [Unity, C#]

- Developed UI and Client-Side Network features of the game
- Owned technical design and development of one of the game modes
- Improved CI/CD processes with automation which led to smoother releases with less server instability

Independent Game Development (2015 - Present)

- As an independent game developer, I make games in my free time and on game jams
- I like to try new tools and keep my knowledge of the modern game tech up to date

Codee.Studio, Russia - (2020)

Multiple outsource projects [Unity, C#]

- Delivered interactive product demonstrations for a larger-scale third parties
- Had multiple responsibilities, including programming, 3D modeling, level and game design

Skills

Programming: C++, C#

Game Engines: Unreal Engine, Unity, Godot, s&b, proprietary engines

Other Skills: Ownership, Communication, Game Design, Mentoring, Leadership, Teamwork, Scrum, Level Design, 3D modeling

Education & Other Info

- **Bachelor's Degree, Computer Science** - Bauman Moscow State Technical University, Russia
Specialization: Robotics and Complex Automation, CAD (Computer-Aided Design)
Bachelor's Thesis: Training Continuous Neural Networks Using Optimal Control Methods
- **Professional Agile Leadership I (PAL I)** certificate
